

MUHAMMAD ABDULLAH

BI & Data Analyst

Lahore, Pakistan · +92 336 381 4693 · abdullahjamshed683@gmail.com · linkedin.com/in/muhammad-abdullah683

PROFILE

BI and data analyst with two years of experience building production ETL pipelines and analytics infrastructure on Google Cloud. Owns an ingestion layer of 60–70+ daily jobs pulling from eight-plus marketing, sales, and web analytics platforms into BigQuery, and roughly 40 Looker Studio dashboards used by the sales, marketing, and finance teams. Particular focus on pipeline reliability: retry orchestration, schema-locked loads, and monitoring that surfaces silent failures before stakeholders notice them.

TECHNICAL SKILLS

Languages Python (pandas, NumPy, requests), SQL, Google Apps Script, PowerShell

Cloud & Warehouse Google BigQuery, Cloud Storage, Compute VMs

BI & Reporting Looker Studio (blends, row-level security, calculated fields), Power BI, Google Sheets

Data Sources Meta Graph & Marketing API, LinkedIn Ads API, Google Analytics 4, Google Search Console, Salesforce, Pardot, Metricool, Selenium web scraping

Practice ETL design, schema management, OAuth token lifecycle, job scheduling & retries, Git / GitLab

EXPERIENCE

Tkxel · Lahore, Pakistan · December 2024 – Present

Business Intelligence Analyst — *May 2025 – Present*

- Build and maintain Python ETL pipelines that load platform API data into BigQuery, running 60–70+ jobs daily across a four-to-six brand portfolio.
- Integrated eight data sources: Meta Graph API, Meta Ads, LinkedIn Ads, Google Analytics 4, Google Search Console, Salesforce, Pardot, and Metricool.
- Collect Facebook and Instagram page and post performance data, including audience demographics.
- Built Selenium scrapers to capture data from platforms with no usable API.
- Maintain around 40 Looker Studio dashboards, modelled in BigQuery SQL, for the sales, marketing, and finance teams.
- Built automated finance reporting in Google Sheets using Apps Script.
- Built a retry wrapper with per-script logging and parallel execution, plus BigQuery health views that flag stale tables and failed runs.
- Optimised Salesforce data models to cut query cost and dashboard load time.
- Set up row-level security in Looker Studio so each stakeholder sees only their own accounts.

Data Analyst, Internship — *December 2024 – April 2025 · converted to full-time*

- Supported internal marketing analytics by collecting campaign and audience data and preparing it for reporting.
- Built audience segments used to target campaigns and allocate ad budget more efficiently.
- Helped set up ETL processes so campaign data collection and reporting ran repeatably instead of manually.
- Learned Python web scraping, Google Cloud, BigQuery, and Looker Studio on the job, and moved into pipeline work before the internship ended.

EDUCATION

BS Information Technology | University of the Punjab

Lahore, Pakistan · October 2021 – August 2025
